

Training on wet cleaning

Lanadol wet cleaning

The most eco-friendly kind of textile care!

Sensitive materials, e.g. wool, silk and cashmere, or sophisticated and elaborated textiles (jacket, blazer, costume) require special care.

For the care of handwash items and textiles labelled with the symbols W and P, we have developed the eco-friendly and still effective Lanadol wet cleaning system.

Knowledge is a crucial capital for any company, and qualified staff is a decisive success factor for your company. Lanadol wet cleaning is the result of the unique know-how that we have continually advanced for more than 20 years. We would like to pass our experience and unequalled procedural know-how on to you! Our training on „Lanadol wet cleaning“ helps you to work even more successfully and effectively.

Use the opportunity and apply for the training. The number of participants is limited to 8!

Training on wet cleaning

Professional wet cleaning offers you the opportunity to expand your own range of services and therefore to win even demanding customers with a healthy and ecological kind of textile care.

Implementing wet cleaning requires essential modifications to the operating technology and the correct application of the special washing and drying procedures. Our training teaches you technical knowledge, and you can put the acquired knowledge into practice in our practical exercises!
